TECH SKILLS

- **Languages & Tools**: Python, SQL, PySpark, Scikit-Learn, TensorFlow, Django, HTML, JavaScript, Git/GitHub, Excel
  Cloud: Microsoft Azure (Blob Storage, Databricks, Queue Storage, Automation Accounts, Function Apps)
  Data Engineering: Delta Lake, ETL, CI/CD (Azure DevOps), Real-Time Streaming, Data Transformation
  ETL Tools: Informatica PowerCenter, IDMS (beginner, currently learning)
  Databases: SQL Server, MySQL, Serverless DBs, Snowflake
  Visualization & Monitoring: Streamlit, Power BI, Grafana, Plotly
  Version Control: Git & GitHub

LANGUAGES

- English (Fluent)
- Swedish (Intermediate)
- Telugu (Fluent)

PROFILE

Motivated Junior Data Engineer with hands-on experience building cloud-based data pipelines using Python, SQL, and Azure. Strong foundation in ETL workflows, Delta Lake, and Power BI dashboarding. Completed a data engineering internship at Simplitics AB, focusing on performance optimization and automation. After taking time to focus on family and resettling in Sweden, I am upskilling in Python, Machine Learning, Deep Learning, and Natural Language Processing through the Python & AI Program at Lexicon, gaining practical experience with TensorFlow, Scikit-Learn, Django, Docker, and cloud tools like Azure. SnowPro Core certified and currently learning Informatica (IICS) to further strengthen my data engineering expertise.

EDUCATION

Python & AI Program - Lexicon, Stockholm 2025-2026

Python • OOP • MongoDB • SQLite • HTML • JavaScript • Django • Docker • Git/GitHub • Scikit-Learn • TensorFlow • Azure

Data Engineer - Nackademin,Solna 2023 - 2025

SSQL (Basic & Advanced) • Power BI • Python for Data Engineering • Azure Cloud • CI/CD • DevOps • Database Modelling • ETL

WORK EXPERIENCE AND PROJECTS

Data Engineering Intern-- Simplitics DEC 2024 – MAY 2025

- Developed a Streamlit dashboard for real-time monitoring of LIA data pipelines.
- Built system pages for logs, job tracing, load stats, and ingestion metrics.
- Implemented seamless multi-page navigation using query parameters.
- Improved early detection of pipeline issues, reducing troubleshooting time.

https://github.com/Bharathi1292/Simplitics_LIA_Dashboard

Superstore Sales Analysis OCT 2024 - DEC 2024

- -Analyzed the Superstore dataset to identify sales, profit, and customer trends.
- Cleaned and transformed data using PySpark and SQL in Databricks.
- Created dashboards and visualizations to highlight regional and seasonal insights.
- Documented workflows and results on GitHub.

ACHIEVEMENTS & HACKATHONS

SnowPro CoreCertification

Issued by Snowflake – June 2025, Credential ID: S99078-250603-SOL25

https://achieve.snowflake.com/1739191d-18c6-485f-9be3-25730d6f7fb5#acc.lZr71ztS
